

In 2018, Plenco Joined the Better Plants Program pledging to improve our energy productivity by 25% over ten years.

In just three years, Plenco has achieved 15% of that 25% goal!

With projects ranging from LED lighting installations to compressed air isolation, Plenco continually strives to improve all facets of energy usage.

In the upcoming years, Plenco hopes to build on our success to become ISO 50001:

Ready Recognized by implementing projects involving Automated Logic controls and Variable Frequency Drive designs.
